Here are three observations/suggestions to improve the overall teaching-learning experience in an institution: *Observation 1: Integration of Technology* - Many classrooms still rely on traditional teaching methods, such as blackboards and textbooks. - Suggestion: Implement a Learning Management System (LMS) to provide students with access to digital resources, online assignments, and grades. - Additionally, incorporate multimedia tools, such as videos, podcasts, and interactive simulations, to enhance student engagement and unders Students often receive feedback and assessment results too late to make meaningful changes.Suggestion: Implement regular, timely, and actionable feedback mechanisms that

allow students to track their progress and adjust their learning strategies.Use technology-enhanced assessment tools to provide immediate feedback and reduce grading time for instructors.
